

# Gold Ribbed Hare's Ear Nymph

**Hook:** Standard nymph;

Tiemco [3761](#)

Dai-Riki [060](#)

**Thread:** [3/0-8/0](#) brown,  
size to match hook size

**Lead:** Diameter to match  
wire of hook

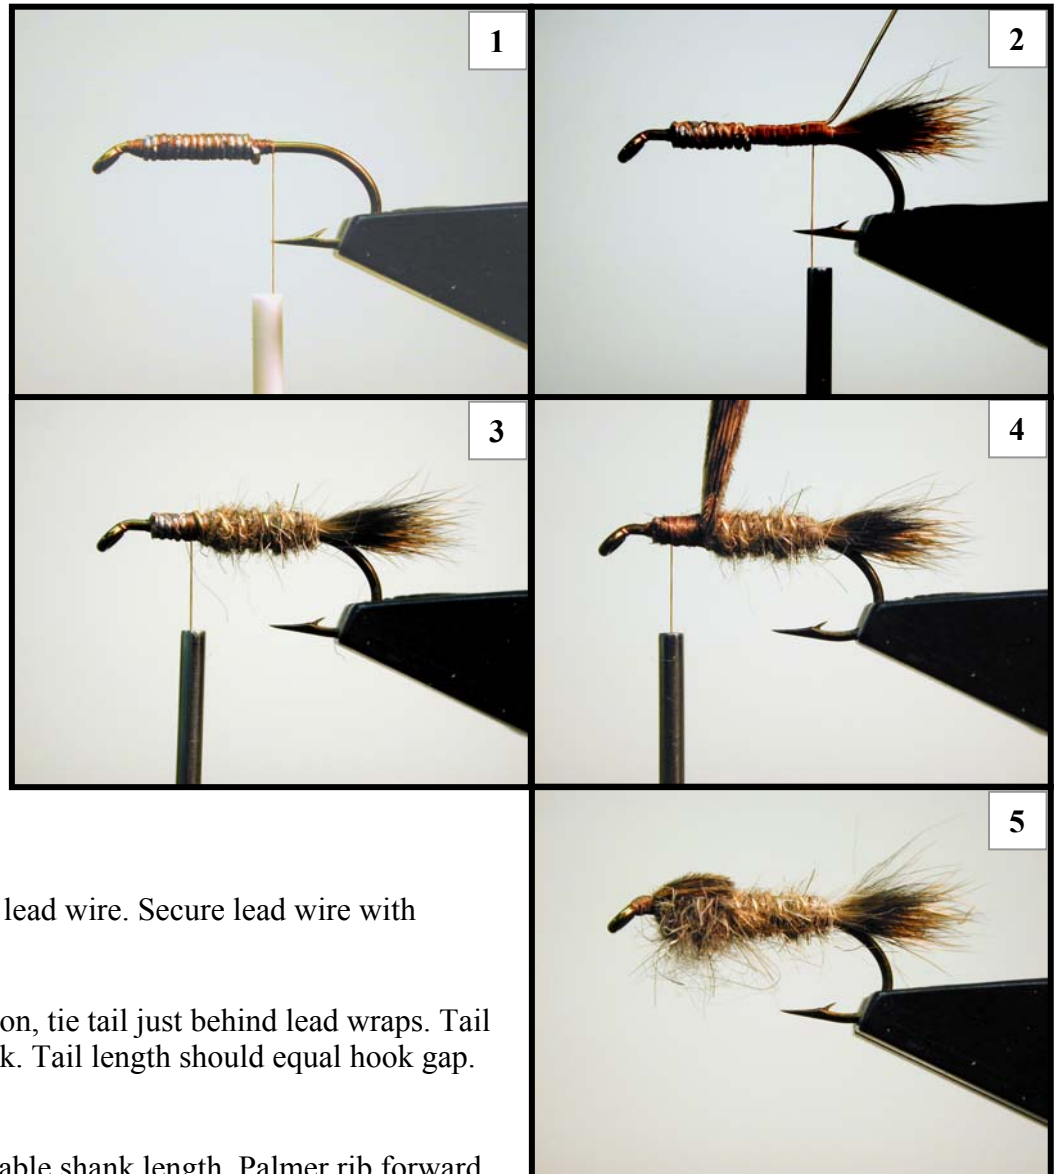

**Tail:** Hare's mask with  
guard hairs

**Rib:** [Gold wire](#) or [oval  
tinsel](#)

**Abdomen:** [Lt. hare's ear  
dubbing](#)

**Wing Case:** [Dark turkey  
quill](#)

**Thorax:** [Dark hare's ear  
dubbing](#)

**1•** Create thread base. Wrap lead wire. Secure lead wire with thread.

**2•** To form a smooth transition, tie tail just behind lead wraps. Tail set position is at barb of hook. Tail length should equal hook gap. Tie in rib material.

**3•** Dub forward to half of usable shank length. Palmer rib forward and tie-off over lead.

**4•** Tie in wing case material. Secure back to abdomen.

**5•** Dub thorax with dark hare's ear dubbing. Fold wing case forward and whip finish. Pick out thorax with a bodkin to simulate legs.
